

DANTROLENE

dan-troe-leen

What does it do?

Dantrolene is used to treat some types of muscle spasms.

How should you take it?

Take *dantrolene* regularly as directed with a glass of water. You can take it with or without food.

What if you forget a dose?

If it is nearly time for your next dose, skip the missed dose and take your next dose at the usual time. Otherwise, take the missed dose as soon as you remember. Do not take two doses at the same time.

Can you take other medicines?

Tell your pharmacist or doctor about all medicines or treatments that you may be taking, including vitamins, herbal products or recreational drugs.

What side effects might you notice?

Side Effects	Recommended action
Symptoms of liver problems including: yellow skin or eyes, itching, dark urine, pale bowel motions, abdominal pain Fast heartbeat	Tell your doctor immediately
Short of breath Muscle weakness	Tell your doctor
Tiredness, drowsiness Dizziness Nausea, vomiting, diarrhoea	Tell your doctor if troublesome

If you notice any other effects, discuss them with your doctor or pharmacist.

Other information:

- Tell your doctor if you have liver, heart or lung problems.
- Tell your doctor if you are pregnant, planning to become pregnant, or breastfeeding.
- *Dantrolene* can impair your ability to do tasks such as driving or using machines. Alcohol makes this worse. Discuss your risk with your health professional. (search NZTA - Are you safe to drive?)
