CEFACLOR

kef-ah-klor

What does it do?

Cefaclor is an antibiotic used to treat and prevent bacterial infections.

Before you start

- Tell your doctor if you have kidney problems.
- Tell your doctor if you are pregnant, planning to become pregnant, or breastfeeding.

How should you take it?

Take *cefador* regularly as directed. You can take it with or without food. Keep taking it until the course is finished, even if you start to feel better.

Capsule: Take with a glass of water.

Liquid: Measure carefully with an oral syringe or measuring spoon. Shake the bottle well before measuring each dose.

What if you forget a dose?

Take the missed dose as soon as possible and continue as directed.

Can you take other medicines?

Tell your pharmacist or doctor about <u>all medicines or treatments</u> that you may be taking, including vitamins, herbal products or recreational drugs.

What side effects might you notice?

| 3 , | | |
|-----|--|---------------------------------|
| | Side Effects | Recommended action |
| | Symptoms of allergy including: skin rash, itching, swelling, trouble breathing | Tell your doctor immediately |
| | Joint, muscle or bone aches and pains, fever Severe or persistent diarrhoea, abdominal pain | Tell your doctor |
| | Small white sores in mouth, furry tongue (oral thrush) Vaginal itch or discharge (vaginal thrush) | Tell your health professional |
| | Stomach upset | Tell your doctor if troublesome |

If you notice any other effects, discuss them with your doctor or pharmacist.

Other information:

• Store cefaclor liquid as directed. Once the course is finished, take any leftover liquid back to your pharmacy.
